

HITESH DHANDHLA

.NET FULL STACK DEVELOPER · C# | ASP.NET Core | Angular | SQL Server

Ahmedabad, Gujarat, India | [9409119670](tel:9409119670) | hitesh.dhandhla@gmail.com

linkedin.com/in/hitesh-dhandhla | github.com/HiteshDhandhla | HiteshDhandhla.github.io

PROFESSIONAL SUMMARY

.NET Full Stack Developer with **4+ years** of experience building and modernizing enterprise web applications and cloud POS platforms for **UK energy** and **retail/restaurant** clients. Strong in C#, ASP.NET Core Web API, Angular, SQL Server and PostgreSQL, with hands-on delivery of Clean (Onion) Architecture, JWT and role-based security, payment and messaging integrations, and background automation services. Contributed to **an AI-assisted modernization (Claude, Codex, Cursor)** that consolidated three legacy platforms into one API and Angular application.

KEY ACHIEVEMENTS

- Cut Group page load time by **~60%** by optimizing SQL queries and application logic on a UK energy platform.
- Contributed to the **AI-assisted consolidation of 3 legacy platforms** (Cimpaas, Ensaar, Enalytics) into a single ASP.NET Core API and Angular 18/21 application (SmartPay).
- Launched **WhatsApp self-service** (WATI API) for quotes, bills and registration status, reducing manual customer-support workload.
- Integrated **3 payment gateways** and real-time WebSocket terminal sync across **4 POS products** for retail and restaurant clients.

TECHNICAL SKILLS

Backend: C#, .NET / .NET Core, ASP.NET Core Web API, ASP.NET Core MVC, ASP.NET MVC (.NET Framework 4.6.1), RESTful APIs, Background Services

Frontend: Angular 18/21/22, TypeScript, JavaScript, jQuery, HTML5, CSS3, Bootstrap, AJAX; Flutter (contributor)

Databases & ORM: SQL Server, PostgreSQL, T-SQL (Stored Procedures, CTEs, Window Functions), Entity Framework, Dapper, ADO.NET, LINQ, Query Optimization

Architecture & Security: Clean (Onion) Architecture, OOP, SOLID, JWT Authentication, Role-Based Access Control (RBAC), Reusable Component Design

Integrations & Cloud: Payment Gateways (iPay88, Revenue Monster, Fomo Pay), Lalamove API, WATI WhatsApp API, WebSocket, SFTP, Amazon S3, iText PDF, POS Hardware

AI & Dev Tools: Claude, Codex, Cursor, Git/GitHub, Visual Studio, VS Code, Postman, Swagger/OpenAPI, monday.com, CI/CD (working knowledge)

PROFESSIONAL EXPERIENCE

Senior ASP.NET Full Stack Developer — WayToWeb Solutions

May 2026 – Present

Cloud-based POS and business-management products (BIGPOS, BIGPOS Lite, BIG Waiter, WTWPOS) for retail and restaurant clients.

- **Build and maintain RESTful APIs and web modules** in C#, ASP.NET/.NET and SQL Server covering orders, payments, inventory, employees and reporting across **4 POS product lines**.
- **Engineer core checkout logic:** cart management, split orders and payments, refunds, discounts, promotions, loyalty programs and receipt generation.
- **Improve and extend payment-gateway connections** with iPay88, Revenue Monster and Fomo Pay, plus the Lalamove delivery API and SFTP-based data exchange, on an existing POS platform.
- **Deliver real-time WebSocket terminal synchronization** and cloud-to-local data sync, keeping orders and stock consistent across devices.
- **Enhance POS hardware support** (thermal printers, barcode scanners, LAN/Bluetooth/BLE devices) and Kitchen/Customer Display Systems (KDS/CDS) on the existing platform.
- **Contribute API integration, order processing and split-payment support** to WTWPOS (Flutter); resolve production issues and change requests while protecting uptime.

Junior ASP.NET Developer — Pozitive Electricity & Gas Pvt. Ltd.

Feb 2025 – Apr 2026

In-house developer for PE Solutions (formerly Pozitive Energy), a UK multi-utility provider: electricity, gas, water, telecom, financial services and EV charging.

- **Contributed to SmartPay modernization (Jan–Apr 2026):** consolidated Cimpaas, Ensaar and Analytics into one ASP.NET Core Web API (Dapper, PostgreSQL) and Angular 18/21 app covering customer, broker, agent, billing and registration workflows.
- **Architected SmartPay** on Clean (Onion) Architecture with JWT authentication, role-based authorization and a provider-agnostic notification layer.
- **Built WhatsApp self-service via WATI** for quote generation, bill retrieval and registration-status checks, plus matching email notifications.
- **Designed multi-level RBAC** for admins, brokers, sub-brokers, agents, customers and group users, protecting sensitive account and billing data.
- **Developed C# console apps and background services** for scheduled, parallel email delivery with dynamically generated PDF attachments.
- Applied **Claude, Codex and Cursor** across planning, coding, refactoring and documentation with developer-led review and testing; turned BA requirements into production features tracked in monday.com.

Junior ASP.NET Developer — Safal Infotech

Jun 2022 – Jan 2025

External developer deployed to PE Solutions (formerly Pozitive Energy), UK energy sector.

- **Developed and enhanced enterprise portals** using ASP.NET MVC, .NET Core, C#, SQL Server and JavaScript.
- **Built dashboards, dynamic business pages, registration workflows** and secure role-based portals for admins, brokers, sub-brokers and agents.
- **Wrote and tuned SQL Server stored procedures and functions;** carried out code reviews and debugging to raise quality and performance.
- **Worked with Business Analysts and cross-functional teams** to deliver features against tight deadlines.

KEY PROJECTS & CONTRIBUTIONS

Energy Management Platforms — Cimpaas, Ensaar & Analytics (PE Solutions)

Jun 2022 – Apr 2026

ASP.NET MVC (.NET Framework 4.6.1), ASP.NET Core MVC, Entity Framework, ADO.NET, SQL Server, iText

- **Enterprise portals:** energy monitoring, customer and group management, partner services, billing operations and role-specific workflows for 7 user levels.
- **Reporting application:** separate ASP.NET Core MVC app on a nightly-refreshed backup database (midnight UK time), isolating reporting load from live systems; searchable reports, filters, dashboards and charts.
- **Reusable lazy loading:** batch-based search-and-scroll dropdown loading 500 records at a time, reused across multiple pages.
- **Change of Tenancy (COT):** SLA-driven dashboards with working-day calculations excluding weekends and holidays; automated day-5 and day-7 reminders and a management report after final COT completion.
- **PDF data extraction:** console tool using iText to pull business, account, billing, commission, meter and digital-signature data from contracts.
- **Advanced SQL:** CTEs, ROW_NUMBER, COUNT OVER, CROSS APPLY, temp tables, pagination, dynamic filtering, history/audit procedures and controlled deactivation routines.
- **Automated communications:** WelcomeMail (letters on contract start date), BulkNotification (frontend-triggered bulk messages), AutoEmailSend (parallel dispatch of queued emails with PDFs) and System Notification (release notes, policy updates, event alerts).

BIGPOS — Cloud-Based Point of Sale Platform

May 2026 – Present

Tech: C#, ASP.NET/.NET, Web API, SQL Server, JavaScript, WebSocket, SFTP, Flutter, POS Hardware Integration

- **Built and maintained a multi-product POS ecosystem** (BIGPOS, BIGPOS Lite, BIG Waiter, WTWPOS) covering sales, inventory, payments, employee management, and reporting for retail and restaurant clients.

EDUCATION

Bachelor of Computer Applications (BCA)

2013 – 2016

Swami Vivekananda College of Computer Science, Maharaja Krishnakumarsinhji Bhavnagar University, Bhavnagar

LANGUAGES

Gujarati (Native) | Hindi (Fluent) | English (Professional working proficiency)
